WORK EXPERIENCE

React Front-end Web Developer

Yamis LLC

📅 May 2022 - December 2023

📍 Philadelphia, PA

- Developing reusable UI components using React.js, JSX, and other related technologies.
- Implementing client-side routing using React Router or similar libraries to enable navigation within single-page applications.
- Integrating third-party APIs, libraries, and services into React applications to add additional functionality, such as authentication, payment processing, or social media sharing.
- Implementing client-side routing and state management solutions within React applications, using libraries like React Router and Redux to manage application state and navigation.

React Front-end Web Developer

DVA Logistics LLC

📅 August 2021 - March 2022

📍 New York, NY

- Developing responsive layouts and components that adapt to various screen sizes and devices, utilizing CSS media queries and responsive design techniques.
- Collaborating with version control using Git to manage codebase changes, facilitate code reviews, and coordinate with other developers in a team environment.
- Staying updated with the latest tools and best practices in frontend development through continuous learning and participating in developer communities.
